

IMMUNE 2 INFODEMIC

Co-production Workshop:

How can we immunise our citizens against future infodemics?

When : 30 May 2023

Where : Press Club, Rue Froissart 95, 1040 Brussels, Belgium

Registration: [Link](#) (Registration is free but mandatory.)

European citizens are all exposed to an **infodemic** spreading increasingly which can severely impact their democratic participation and engagement. This may include **disinformation, misinformation, fake news**, and **other types of interference** on different issues related to public life. A pre-emptive approach needs to be taken to decrease the worsening impact, such as using vaccination against the spread of the pandemic.

IMMUNE 2 INFODEMIC **aims** to immunise **EU citizens/residents** against disinformation and misinformation on selected themes by empowering and equipping them with several easy-to-use tools. The project consortium formulates and co-produces 3 **instruments** (*vaccines*): digital literacy, media literacy, and critical thinking; and applies these instruments to 3 selected hot **themes** (*boosters*): elections, COVID-19 and migration.

The **workshop** aims to **initiate the coproduction of the materials** (videos, infographics, presentations) that will be used in **events, workshops and e-learning settings** against dis/misinformation.

We would like to involve the experts and target group in the product design at the initial phase by bringing educators, researchers, practitioners, media and communication experts, etc. together.

Agenda

Time	Activity
09.30 - 10.00	Coffee and Registration
10.00 - 10.15	Opening and Keynote speeches <i>Silvia López Arnao, Legal and Policy officer at European Commission/ DG JUST</i> <i>Ivan Botoucharov, Political Adviser at European Parliament/ ING2</i>
